## **DETAILED ACTION**

1. Misnumbered claims 65-105 have been renumbered 66-106.

### *Election/Restrictions*

2. Claims 1-99 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 31, 2005.

### *Claim Objections*

3. Claim 102 is objected to because of the following informalities: the phrase "an anvil sleeve" contradicts the terminology (a cable extension element) used to describe this element in the specification (pages 49-51). Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 100-103 are rejected under 35 U.S.C. 102(b) as being anticipated by Grant et al. (USPN 5,609,285).

In reference to claims 100-103, Grant et al. discloses a surgical device, comprising: a housing (70) defining a bore; a trocar shaft (84) disposed through the bore of the housing (70; figure 7) so as to be moveable relative to the housing (70) by operation of at least one driver (82) within the housing, wherein at least a portion of the trocar shaft (84) is flexible; and an anvil (100) attachable to the trocar shaft (84) and configured to be moveable relative to the housing

(70) by movement of the trocar shaft (84; column 11 lines 1-35; column 14 lines 14-18), wherein the anvil (100) includes an anvil shaft (110), the anvil shaft defining a trocar receiving slot, and the trocar shaft (84) including a trocar (200) configured to be insertable within the trocar receiving slot (figure 38); and the trocar receiving slot is defined in an anvil sleeve having an axially-extending bore in communication with the trocar receiving slot, wherein the axially-extending bore has a wide portion into which the trocar (200) is insertable and a narrow portion (435) which retains the trocar within the axially-extending bore.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 104-106 are rejected under 35 U.S.C. 103(a) as being obvious over Grant et al. (USPN 5,609,285) in view of Whitman (USPN 6,491,201).

Regarding claims 104-106, Grant et al. discloses a surgical instrument having a driver, but does not disclose the driver as being rotatable via a operator controlled motor. Whitman teaches a surgical instrument having a flexible shaft (215) movable relative to a housing (155) by way of a rotatable driver (170) selectively rotated by at least one motor (165) via a controller (160). It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the surgical instrument of Grant et al. to include the motor rotatable driver of Whitman, as column 3 lines 17-31 of Whitman states that such a modification allows an operator to selectively alter the direction in which the driver shaft is rotated.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
